If you lived in London for a period, you would probably begin to follow the British way of reading newspapers 36, you have a national morning paper delivered to your home early in the morning, 37 that when you get up, you can skim through the newspaper over breakfast

38, on your way to your place of work by bus or underground train, you read the newspaper in

detail and if you have not finished reading all the parts that interest you, you continue to read bits during the day On your return home, you buy the local London evening paper and read it on the bus or train 39 national papers tend to have a lot of pages and are printed during the night, local or regional papers tend to have fewer pages and are printed during the day, with the result that local papers take far less time to read

40, local newspapers serve a different purpose to national newspapers These papers report on things happening in the local community and give information about local events They 41 include local cinema and theatre times and carry advertisements for jobs, houses and flats to rent or buy, secondhand cars, secondhand household goods and furniture — anything that is not new 42 which people want to sell in order to make a little money People also put in advertisements to find work and advertise their own particular skills, 43, housework, house painting, gardening, cooking, teaching French as a private tutor, and so on

44, by reading two newspapers a day, you are informed, on the one hand, by national and international news reports and , 45, by local events and information of a more practical nature

36	A	As a result	B	That is	C However
37	A	so	B	even	C but

Passage 1

People have sailed around the world in quite small boats It is not an easy thing to do Sometimes the weather gets bad That can be the end of a boat, and the end of everyone in it Accidents can happen easily and quickly .

One family had an accident with some big fish (Perhaps it wasn't an accident for the fish) The fish swam under their boat and bit holes in it The sea came in, of course, and they all got into that They lived and hoped for many days They ate and slept, and they always hoped At last a ship found them

How do people live in a very small life-boat? Perhaps for weeks or months? They must be strong in every way They must have hope — they must want to live But you can not eat and drink hope

You cannot drink sea water Drink a lot of sea water — and you will quickly die Sailors can drink rain water They must catch rain water in their boat They must also catch fish and birds for food Life-boats do not often carry a cooker, and so the sailors cannot cook their food Raw fish and bird — meat is not very nice But there won't be any choices in a life-boat! The sailors must eat raw food or they will die

What do people think about in a life-boat? They think about land, a warm bed, dry clothes, fresh water and food, food, food
